| Smooth Muscle Antibody Titer |                       | Indirect Fluorescent Antibody   |                    |                       |  |
| SPECIMEN REQUIREMENTS        |                       |   |                    |                       |  |
| Specimen                     | Specimen Volume (min) | Specimen Type   | Specimen Container | Transport Environment |  |
| Preferred                    | 1.0 mL                | Serum   | Clot Activator SST | Refrigerated          |  |
| Instructions                 | ·                     | Allow specimen to clot completely at room temperature. Separate serum or plasma from cells ASAP or within 2 hours of collection.  Stability After separation from cells: Ambient 4hours, Refrigerated 7 days, Frozen 1 month (avoid repeated freeze/thaw cycles). |                    |                       |  |

| GENERAL INFORMATION |   |
|---------------------|---|
| Testing Schedule    | Mon - Fri   |
| Expected TAT        | 3 Days  |
| Clinical Use        | Smooth muscle antibody is in high titers (>/= 1:160) in approximately 97% of patients with autoimmune chronic active hepatitis. |
