

Order Name: **METHYLMA S** Test Number: 2051075 Revision Date: 12/12/2022

| TEST NAME          |   |                               | METHODOLOGY                               | LOINC CODE            |
|--------------------|---|-------------------------------|---|-----------------------|
| Methylmalonic Acid |   |                               | Quant Liquid Chromatography-Tandem Mass S | pectrometry 13964-2   |
| SPECIMEN REQUIR    | REMENTS   |                               |   |                       |
| Specimen           | Specimen Volume (min)   | Specimen Type                 | Specimen Container                        | Transport Environment |
| Preferred          | 2 mL (0.6 mL )  | Serum                         | Clot Activator SST                        | Refrigerated          |
| Alternate 1        | 2 mL (0.6 mL )  | Plasma                        | Lithium Heparin PST (Green/Gray<br>Top)   | Refrigerated          |
| Instructions       | <ul> <li>Notes: 0.6 mL (Note: This volume Does NOT allow for repeat testing).</li> <li>Specimen Type: Red-top tube, gel-barrier tube OR green-top (heparin) tube</li> <li>Specimen Storage: Refrigerated</li> <li>Specimen Collection: Separate serum or plasma from cells within one hour of collection.</li> <li>Specimen Stability: Ambient: 14 days, Refrigerated : 14 days, Frozen: 19 days</li> </ul> |                               |   |                       |
| GENERAL INFORM     | ATION   |                               |   |                       |
| Expected TAT       | 3 - 6 days six working  | days after setup by performin | ig lab.                                   |                       |

| Service Provided By | Oklahoma, Inc.   |
