Order Name: HPV, HPV Gentype Rflx

Test Number: 6910105 Revision Date: 10/10/2018

TEST NAME		METHO	DOLOGY	LOINC CODE	
HPV Screen Interpretati	on				
SPECIMEN REQUIREMENTS					
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment	
Preferred	Cervical brush	PAP specimen	ThinPrep PreservCyt solution	Room Temperature	
Instructions	Stability: Specimen must be transferred from ThinPrep PAP vial into an Aptima Specimen Transfer tube within 30 days. Once transferred, the specimen is stable in the Aptima vial for 30 days refrigerated. Patient information The patient should be tested 2 weeks after the first day of her last menstrual period, and definitely not when she is menstruating. The patient should not use vaginal medication, vaginal contraceptives, or douches for 48 hours before the exam. The patient should refrain from intercourse 48 hours prior to the exam.				
	Preferred Specimens are samples from the female genital tract for Pap testing should be obtained with a cytobrush/spatula combination or a broom collection device and rinsed into a ThinPrep Pap® vial containing PreservCyt® solution.			ush/spatula combination or a broom	
	Specimen collection preparation Prepare the speculum. For patients without physical or physiological need for lubricant, use lukewarm water to warm and lubricate the speculum. When necessary, sparingly apply carbomer-free lubricant on the exterior of the speculum blades. Do not use an excessive amount of lubricant jelly to lubricate the speculum. Remove excess mucus or other discharge present before taking the				

sample. This should be gently removed with ring forceps holding a folded gauze pad. Remove inflammatory exudate from the cervical canal before taking the sample. Remove by placing a dry 2-by-2-inch piece of gauze over the cervix and peeling it away after it absorbs the exudate or by using a dry procto swab or Scopette swab. The cervix should not be cleaned by washing with saline or it may result in a relatively acellular specimen.

GENERAL INFORMATION		
Testing Schedule	Mon-Sat	
Expected TAT	1-2 days after set-up	
Notes	If HPV Screen is Detected then the HPV Genotypes 16/18/45 will be added on at additional cost. Order Code: .HPV Genotypes 16/18/45 [6910106] Result Code: HPV Genotype Interpretation [6910106] CPT: 87625. This is a Reflex Order Only, Not Orderable Individually
