

SARS-COV2, Flu A/B, RSV Respiratory 4Plex

Order Name: COV2 FLU RSV 4P

Test Number: 6907558

Revision Date: 10/01/2022

TEST NAME	METHODOLOGY	LOINC CODE
SARS-CoV2 AMP	Nucleic Acid Detection	94500-6
Influenza A by AMP	Nucleic Acid Detection	85477-8
Influenza B by AMP	Nucleic Acid Detection	85478-6
Respiratory Syncytial Virus AM 4P	Nucleic Acid Detection	85479-4
[6907561] SARS-CoV-2 Source (NP, OP, MT, AN)	Prompt	31208-2
[6907265] First Test for COVID-19? (Y,N,U)	Prompt	95417-2
[6907267] Employed in Healthcare? (Y,N,U)	Prompt	95418-0
[6907269] Symptomatic? (Y,N,U)	Prompt	95419-8
[6907271] If Symptomatic, Date of Onset:	Prompt	11368-8
[6907273] Is the Patient Hospitalized? (Y,N,U)	Prompt	77974-4
[6907287] Is the Patient in the ICU? (Y,N,U)	Prompt	95420-6
[6907289] Does Patient Reside in Congregate/Group Care Setting? (Y,N,U)	Prompt	95421-4
[6907290] Pregnancy status? (Y,N,U)	Prompt	82810-3

SPECIMEN REQUIREMENTS					
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment	
Preferred	1-3mL (0.8mL)	See Instructions	See Instructions	See Instructions	
Instructions	If collecting MT or AN virus particle collection 2. Any swab of approp 3. Do NOT submit swallisted, depending on a Refrigerate specimen 4. Media types: VTM, Letter PCR assay. The small volume of the Labcorp Oklahoma, Information be labeled with two unand submit with pape 6. Please keep specimen 7. Causes for rejection temperature swabs generally inhibitory to PCR included.	If specimens, both nares should be and a specimens, both nares should be an a size and configuration with the swith calcium alginate tips of size of swab as if they will be received in lab with JTM, M6, or sterile saline (ESwab this collection device can cause the acceptance of the saline of the swap of the saline of the swap of	th a synthetic or rayon tip and plastic r swabs with wood shafts. All Other Swatthin 72 hours of collection. If there will be a collection kits should no longer be used echnical issues with PCR and precludes oblection devices.) Token or cut at the top of the tube, and to on or place electronic order. Place the tube, sys; swabs with wooden shafts; refrigerate orly labeled; grossly contaminated; broken on, EDTA concentrations >0.01M; unaccompositions.	ab and placed in a single tube to maximize shaft can be used. wab types: Suitable for all specimen sites delayed transport, freeze specimen at -20'C. defor specimen collection for the SARS COV2 any repeat or additional testing. Contact your ubes tightly capped. Specimen tubes should ube containing the swab in a biohazard bag ed samples greater than 72 hours old; room en or leaking tube; collection with substances	

GENERAL INFORMATION	
Testing Schedule	Daily *(see notes section)
Expected TAT	48-96 hours from receipt of specimen in lab.
Notes	Regional Medical Laboratory continues to be a valuable leader at the forefront of the Coronavirus pandemic, having conducted more than 131,000 SARS-CoV-2 PCR tests over the last 4 months to meet the COVID-19 testing needs of the communities we serve.
