

Nicotine and Metabolites - Confirmation/Quantitation, Urine

Order Name: **NICOTINE U**
Test Number: 4312335
Revision Date: 04/27/2023

TEST NAME	METHODOLOGY	LOINC CODE
Nicotine Quantitative, Urine	Quantitative HPLC/Tandem Mass Spectrometry	3854-7
Cotinine Quantitative, metabolite, Urine	Quantitative HPLC/Tandem Mass Spectrometry	10366-3
Anabasine, Urine	Quantitative HPLC/Tandem Mass Spectrometry	33915-0

SPECIMEN REQUIREMENTS

Specimen	Specimen Volume (mL)	Specimen Type	Specimen Container	Transport Environment
Preferred	1 mL (0.5 mL)	Urine, Random	Sterile Urine container	Room Temperature
Instructions	Specimen Type: Urine container, no preservatives Specimen Storage: Maintain specimen at room temperature. Stability: Stable at room temperature, refrigerated and frozen for up to 14 days			

GENERAL INFORMATION

Testing Schedule	Performed M-F AM only
Expected TAT	Results expected 8-11 days from set-up
CPT Code(s)	80323
Service Provided By	 labcorp Oklahoma, Inc.
