

Porphobilinogen (PBG) Deaminase, RBC

Order Name: **PBG-D RBC**
Test Number: 6905117
Revision Date: 12/12/2022

TEST NAME	METHODOLOGY	LOINC CODE
Porphobilinogen Deaminase RBC	<u>Quantitative Enzymatic/Fluorometry</u>	49228-0
Hemoglobin (client supplied)		718-7

SPECIMEN REQUIREMENTS				
Specimen	Specimen Volume (mL)	Specimen Type	Specimen Container	Transport Environment
Preferred	3 mL (1 mL)	Whole Blood	EDTA (Lavender Top)	Refrigerated
Alternate 1	3 mL (1 mL)	Whole Blood	Sterile Screwtop Container	Frozen
Instructions	<p>Notes: 1 mL (Note: This volume Does NOT allow for repeat testing). Specimen Type: Whole Blood from Lavender-top (EDTA) tube Specimen Storage: FREEZE Specimen Collection: Transfer specimen to plastic transport tube before freezing. Special Instructions: Testing referred to ARUP TC 99550 Specimen Stability: Ambient: Not Available, Refrigerated : Not Available, Frozen: Not Available</p>			

GENERAL INFORMATION	
Expected TAT	7 - 12 days
Notes	Labcorp Test Code: 827632
CPT Code(s)	82657
Service Provided By	 labcorp Oklahoma, Inc.
