

**MYC 8q24 FISH**

Order Name: **MYC FISH**  
Test Number: **6907275**  
Revision Date: **01/06/2020**

| TEST NAME     | METHODOLOGY | LOINC CODE |
|---------------|-------------|------------|
| MYC 8q24 FISH |             | 42794-8    |

| SPECIMEN REQUIREMENTS |                                                                                                                                                                                                                         |               |                                     |                       |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-------------------------------------|-----------------------|
| Specimen              | Specimen Volume (min)                                                                                                                                                                                                   | Specimen Type | Specimen Container                  | Transport Environment |
| Preferred             | mL ( mL)                                                                                                                                                                                                                | Tissue        | Paraffin Block                      | Refrigerated          |
| Alternate 1           | 5 mL (1 mL)                                                                                                                                                                                                             | Bone Marrow   | Sodium Heparin (Green Top, No-Gel)  | Room Temperature      |
| Alternate 2           | 5 mL (1 mL)                                                                                                                                                                                                             | Whole Blood   | Sodium Heparin (Green Top / No-Gel) | Room Temperature      |
| Instructions          | Stability:<br><b>Bone Marrow/Whole Blood:</b> Room Temp: 72 hours; Refrigerated: Unacceptable; Frozen: Unacceptable<br><b>Paraffin Block:</b> Room Temp: Indefinitely; Refrigerated: Indefinitely; Frozen: Unacceptable |               |                                     |                       |

| GENERAL INFORMATION |                                                                                                                                                                                      |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Testing Schedule    | Mon - Fri                                                                                                                                                                            |
| Expected TAT        | 3 - 5 days after set up                                                                                                                                                              |
| Clinical Use        | Alternate Names: FISH MYC 8q24, MYC-BA                                                                                                                                               |
| Notes               | Possible reflex test could be <b>BCL-6 FISH (6907285)</b><br><br>Reference Lab: Tricore<br>Test Code: FMYC<br><a href="#">Click Here</a> to view information on the Tricore website. |
