

**Hepatitis B Virus Triplet Profile**

 Order Name: **HEP B TRIP**

Test Number: 5195227

Revision Date: 11/16/2023

SPECIMEN REQUIREMENTS				
Specimen	Specimen Volume (min)	Specimen Type	Specimen Container	Transport Environment
<b>Preferred</b>	<b>4 mL (2 mL)</b>	<b>Serum</b>	<b>Clot Activator SST</b>	<b>Refrigerated</b>
<b>Instructions</b>	Absoulute minimum is 2 mL serum to run all three assays in this panel. Specimen stability: Ambient 3 days, Refrigerated 7 days, Frozen >7 days			

GENERAL INFORMATION	
<b>Testing Schedule</b>	Mon - Fri
<b>Expected TAT</b>	1-2 Days
<b>Clinical Use</b>	The Hepatitis B Triplet profile provides a baseline for <b>acute infection</b> (HBsAg), <b>immunity</b> to HBV (HBsAb) through vaccination or infection and even reveals if the patient has had a <b>prior infection</b> with HBV (HBcTotal Ab). The HBV Triplet Profile is in response to the new CDC HBV guidelines and will be valuable in the management of a patient who had or has a high-risk lifestyle for HBV. If considering only an acute infection of HBV then the Hepatitis B Profile is appropriate, but if desiring to establish an informative baseline for HBV then the Hepatitis B Triplet Profile will be most appropriate.
